### HOBBIES AND INTERESTS

#### About Me

As a second-year student at the Bucharest Academy of Economic Studies, I am deepening my expertise in Economic Informatics while continuing my journey toward a Bachelor's degree. Over the past year, I have expanded my knowledge in Information Technology, gaining both theoretical and practical insights.

Throughout my coursework, I have developed a strong foundation in database management, SQL, and object-oriented programming. I have completed projects involving database design and complex queries, showcasing my ability to apply technical skills to real-world economic scenarios. In addition, I have enhanced my proficiency in programming languages like Python and C++, and furthered my experience with tools such as Visual Studio Code, Git, and Bash/Unix.

Beyond technical skills, I am actively seeking to apply my knowledge through internships and practical experiences in the IT industry, eager to contribute to innovative projects. My enthusiasm for learning, combined with a growing skill set, equips me to tackle challenges and seize opportunities in this ever-evolving field.
